NOTES TO THE INTERIM FINANCIAL REPORT – THIRD QUARTER ENDED 30 SEPTEMBER 2023

(I) Compliance with Malaysian Financial Reporting Standard (“MFRS”) 134: Interim Financial Reporting

(a) **Accounting Policies, Presentation and Methods of Computation**

The interim financial report is unaudited and has been prepared in accordance with MFRS 134 “Interim Financial Reporting” and paragraph 9.22 of Bursa Malaysia Securities Berhad (“Bursa Securities”) Listing Requirements.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2022. The accounting policies, presentation and methods of computation adopted for the interim financial report are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2022 except for the adoption of amendments to published standards for the Group for the financial year beginning 1 January 2023:

- Amendments to MFRS 101 and MFRS Practice Statement 2 on disclosure of accounting policies
- Amendments to MFRS 108 on definition of accounting estimates
- Amendments to MFRS 112 on deferred tax related to assets and liabilities arising from a single transaction

The adoption of these amendments to published standards did not have any material impact on the interim financial report of the Group.

(b) **Seasonal or Cyclical Factors**

On an overall basis, the business operations of the Group’s Leisure & Hospitality Division and Plantation Division are subject to seasonal fluctuations. The results of the Leisure & Hospitality Division are affected by major festive seasons and holidays. Fresh fruit bunches (“FFB”) production is seasonal in nature. Production of FFB normally peaks in the second half of the year but this cropping pattern can be affected by changes in weather conditions. More detailed commentary is set out in Notes 1 and 2 in Part II of this interim financial report.

(c) **Unusual Items Affecting Assets, Liabilities, Equity, Net Income or Cash Flow**

There were no unusual items affecting the assets, liabilities, equity, net income or cash flows of the Group for the nine months ended 30 September 2023.

(d) **Material Changes in Estimates**

There have been no significant changes made in estimates of amounts reported in prior financial years.

(e) **Changes in Debt and Equity Securities**

- (i) On 29 June 2023, Resorts World Las Vegas LLC (“RWLVLLC”), an indirect wholly owned subsidiary of the Company, announced that it closed USD800 million of senior secured credit facilities (“Amended Facilities”) which were established by way of an amendment and extension of its existing USD1,345 million senior secured credit facilities (“Existing Facilities”). The Amended Facilities, together with the equity and junior capital described below, were used to refinance a portion of the Existing Facilities, pay transaction fees and expenses associated with this refinancing, and, in certain circumstances in the future, fund RWLVLLC’s general corporate requirements.

The Amended Facilities, comprising a USD700 million term loan and a USD100 million revolving credit facility, have a scheduled maturity date of 16 October 2027, and include certain terms which provide additional operational and financing flexibility to RWLVLLC relative to those contained in the Existing Facilities. In connection with closing of the Amended Facilities, Genting Berhad and its unlisted subsidiaries (a) made new equity contributions to RWLVLLC (“Equity Contribution”); and (b) provided subordinated shareholder loan in the principal amount of USD300 million.

Upon closing of the Amended Facilities, RWLVLLC’s weighted average debt maturity was extended because the Amended Facilities effectively extend the maturities of the Existing Facilities from 16 April 2024 to 16 October 2027, and RWLVLLC’s Total Net Leverage Ratio was reduced due to the satisfaction of the Equity Contribution.

- (ii) On 20 July 2023, the Company announced that its indirect wholly owned subsidiaries, RWLVLLC and RWLV Capital Inc., have on 19 July 2023, priced their offering of USD400 million aggregate principal amount of 8.45% Senior Notes due 2030 (“Notes”).

On 28 July 2023, the Company further announced that the Notes were issued by RWLVLLC and RWLV Capital Inc. on 27 July 2023 and have been listed on the Official List of the Singapore Exchange Securities Trading Limited on 28 July 2023.

- (iii) On 5 May 2023, GENM Capital Berhad (“GENM Capital”), a direct wholly owned subsidiary of Genting Malaysia Berhad (“GENM”), which is 49.3% owned by the Company, had issued RM500 million in nominal value of Medium Term Notes (“MTN”) via 3 tranches under the RM5.0 billion in nominal value of MTN Programme. This is the third issuance by GENM Capital under the MTN Programme. The proceeds from the issuance of the MTNs shall be utilised for operating expenses, capital expenditure, investment, refinancing, working capital requirements and/or general funding requirements and to finance the development and/or redevelopment of the properties and/or resorts of GENM and/or its subsidiaries including those located in Genting Highlands, Pahang, Malaysia.

Other than the above, there were no other material issuance, cancellation, share buy-back, resale and repayment of debt securities or equity securities for the nine months ended 30 September 2023.

(f) Dividends Paid

Dividends paid during the nine months ended 30 September 2023 are as follows:

	RM'million
Final single-tier dividend paid on 20 April 2023 for the financial year ended 31 December 2022	
- 9.0 sen per ordinary share	<u>346.6</u>

(g) Segment Information

The segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker whereby the Group’s business is considered from both geographic and industry perspective. The performance of the operating segments is based on a measure of adjusted earnings/(losses) before interest, tax, depreciation and amortisation (“EBITDA/(LBITDA)”). Items not forming part of the adjusted EBITDA/(LBITDA) include net fair value gain or loss on financial assets, gain or loss on disposal of assets, assets written off, gain or loss on derecognition and change in shareholding of associates and joint ventures, project costs written off, impairment losses, reversal of previously recognised impairment losses, pre-opening and development expenses and share-based payment expenses.

(g) **Segment Information (Cont'd)**

Segment analysis for the nine months ended 30 September 2023 is set out below:

(n) **Fair Value of Financial Instruments**

The Group uses the following hierarchy for determining the fair value of all financial instruments carried at fair value:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

As at 30 September 2023, the Group's financial instruments measured and recognised at fair value on a recurring basis are as follows:

RM'million	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets at fair value through other comprehensive income	280.5	-	179.6	460.1
Financial assets at FVTPL	34.2	-	216.9	251.1
Derivative financial instruments	-	5.2	-	5.2
	<u>314.7</u>	<u>5.2</u>	<u>396.5</u>	<u>716.4</u>
Financial liability				
Derivative financial instruments	-	0.1	-	0.1

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared with the last financial year ended 31 December 2022.

The following table presents the changes in financial instruments classified within Level 3:

	RM'million
As at 1 January 2023	427.9
Foreign exchange differences	11.9
Fair value changes – recognised in other comprehensive income	(1.0)
Fair value changes – recognised in income statements	(45.9)
Dividend income and interest income	4.7
Transfer out of Level 3	(1.1)
As at 30 September 2023	<u>396.5</u>

During the nine months ended 30 September 2023, the Group transferred certain investments from Level 3 into Level 1 following the exchange of these investments with publicly listed shares.

Quarter ended 30 September 2023 compared with quarter ended 30 September 2022

Revenue of the Group for the current quarter recorded RM7,369.5 million, an increase of 20% compared with the previous year's corresponding quarter's revenue of RM6,121.6 million. The increase in revenue was contributed mainly by the Leisure & Hospitality Division. The Group's adjusted earnings before interest, tax, depreciation and amortisation ("EBITDA") for the current quarter was RM2,728.0 million, an increase of 33% compared with RM2,056.4 million in the previous year's corresponding quarter.

Resorts World Sentosa ("RWS") continued to benefit from the sustained recovery of travel and tourism by recording a higher revenue and adjusted EBITDA in the current quarter.

Resorts World Genting ("RWG") recorded higher revenue in the current quarter over the previous year's corresponding quarter mainly due to higher volume of business registered by RWG's gaming and non-gaming segments. Consequently, a higher adjusted EBITDA was recorded primarily due to the higher revenue which was partially offset by higher operating expenses in the current quarter.

The revenue from the leisure and hospitality businesses in the United Kingdom ("UK") and Egypt in the current quarter was higher due to higher volume of business. A higher adjusted EBITDA was recorded mainly due to higher revenue, partially offset by higher payroll related costs.

The leisure and hospitality businesses in the United States of America ("US") and Bahamas included the financial results of Resorts World New York City ("RWNYC"), Resorts World Bimini ("RW Bimini") and Resorts World Las Vegas ("RWLV"). Higher revenue and adjusted EBITDA were recorded by RWNYC. RW Bimini's operating performance also improved with higher revenue as a result of relaxation on travel restrictions since 19 June 2022 leading to higher number of cruise calls that contributed positively to its revenue. A higher adjusted EBITDA was recorded mainly due to higher revenue, partially offset by higher operating and payroll related expenses.

RWLV achieved a new record for revenue and adjusted EBITDA in the current quarter with better performance driven by the continued growth of convention business, strong performance from casino and strengthening of USD. Hotel occupancy and Average Daily Rate ("ADR") for the current quarter were 91.1% and USD246 respectively, compared with 86.4% and USD232 in the previous year's corresponding quarter.

Plantation Division's revenue was lower in the current quarter due to lower sales volume at Downstream Manufacturing, partly compensated by Oil Palm Plantation which recorded higher revenue on the back of stronger FFB production. Consequently, adjusted EBITDA for Oil Palm Plantation was higher in line with higher FFB production. The Downstream Manufacturing segment recorded losses in the current quarter.

The Oil & Gas Division recorded lower revenue and adjusted EBITDA mainly due to weaker global crude oil prices in the current quarter.

Profit before taxation of RM1,391.0 million was recorded in the current quarter compared with RM734.5 million in the previous year's corresponding quarter. The higher profit was mainly due to higher adjusted EBITDA, coupled with lower impairment losses, lower net finance cost, higher share of profit in joint ventures and associates, partially offset by higher depreciation and amortisation. The higher share of profit in joint ventures and associates was mainly contributed from the Meizhou Wan power plant in China due to higher generation coupled with lower coal cost compared with previous year's corresponding quarter.

Nine months ended 30 September 2023 compared with nine months ended 30 September 2022

Group revenue of RM19,851.2 million and adjusted EBITDA of RM6,556.6 million for the current nine months improved by 24% and 22% respectively over the previous year's nine months. The improved results are attributed mainly to the contribution from the Leisure & Hospitality Division.

Revenue and adjusted EBITDA of RWS increased significantly over the previous year's nine months by 60% and 63% respectively.

Revenue from RWG in the current nine months was higher mainly due to higher business volume from the gaming and non-gaming segments following the relaxation of border control as compared with previous year's nine months, when several key markets had not yet reopened. Consequently, a higher adjusted EBITDA was recorded which was partially offset by higher operating expenses.

The leisure and hospitality businesses in UK and Egypt recorded higher revenue mainly due to higher volume of business. However, a lower adjusted EBITDA was recorded compared with the previous year's nine months primarily due to higher payroll and related costs which were partially offset by the higher revenue.

Higher revenue and adjusted EBITDA were recorded from the leisure and hospitality businesses in the US and Bahamas. RWNYC recorded a higher revenue mainly due to overall higher volume of business. Improved operating performance of RW Bimini resulted from relaxation on travel restriction since 19 June 2022 leading to higher number of cruise calls that contributed positively to its revenue. Adjusted EBITDA of RWNYC and RW Bimini likewise increased, partially offset by higher operating and payroll related expenses.

RWLV achieved a hotel occupancy rate and ADR of 90.4% and USD256 respectively in the current nine months, compared with 82.4% and USD233 for the same period last year. In addition, RWLV benefited from a mix of concert headliners and events, including the NFL Super Bowl and college basketball tournaments, paired with a robust convention quarter which drove strong visitation to RWLV's property. The stronger USD also contributed to increased revenue and adjusted EBITDA.

Revenue and adjusted EBITDA from the Plantation Division for the current nine months were lower mainly due to weaker palm products prices which outweighed the improvement in the FFB production mainly driven by the Indonesian estates. Adjusted EBITDA from Downstream Manufacturing was lower owing to margin deterioration.

Revenue and adjusted EBITDA of the Power Division improved in the current nine months mainly due to higher generation from the Banten Plant in Indonesia following a shorter outage period. The Oil & Gas Division recorded lower revenue and adjusted EBITDA mainly due to lower global crude oil prices in the current nine months.

Adjusted EBITDA from Investments & Others included the impact of unrealised foreign exchange translation losses of GENM Group's USD denominated borrowings mainly due to the strengthening of USD against RM.

A profit before taxation of RM2,701.5 million was recorded in the current nine months compared with RM1,145.3 million in the previous year's nine months. The higher profit was flowed down from higher adjusted EBITDA, coupled with net gain on disposal of property, plant and equipment, lower net finance cost, lower impairment losses and lower share of losses in joint ventures and associates.

Material changes in profit before taxation for the current quarter compared with the immediate preceding quarter

A profit before taxation of RM1,391.0 million was recorded in the current quarter compared with RM742.5 million in the preceding quarter. The higher profit was mainly due to the Group's higher adjusted EBITDA, lower impairment losses and a share of profit compared with a share of loss from joint ventures and associates in the immediate preceding quarter. These were partially offset by higher depreciation and amortisation in the current quarter and the inclusion of a net gain on disposal of property, plant and equipment by GENM Group in the immediate preceding quarter.

The revenue and adjusted EBITDA of RWS was higher in the current quarter. Gross gaming revenue improved by 31% on a hold-normalised basis, exceeding the levels of 2019 for both VIP and mass gaming segments. Non-gaming revenue improved by 22%, as a result of increased foreign visitor arrivals and higher customer spend during the summer holiday season.

Higher adjusted EBITDA was recorded by the leisure and hospitality businesses in the UK and Egypt in the current quarter mainly due to higher volume of business.

The increase in adjusted EBITDA of the leisure and hospitality businesses in the US and Bahamas came primarily from RWLV. RWLV's revenue and adjusted EBITDA for the current quarter continued to gather momentum since its opening, aided by re-bounding travel trends. As of September 2023, visitor volume increased by 6.6% and convention attendance increased by 27.8% year-on-year, according to the Las Vegas Convention Visitors Authority. Overall, hotel occupancy and ADR for the current quarter remained strong at 91.1% and USD246 respectively, compared with 90.2% and USD243 in the preceding quarter.

Higher adjusted EBITDA from the Plantation Division was mainly contributed by higher palm product sales volume which outweighed the impact of weaker palm product prices.

The Oil & Gas Division recorded an increase in adjusted EBITDA with global crude oil prices trading higher in the current quarter.

A lower loss was recorded from the Investments & Others Division mainly due to lower net foreign exchange translation losses recorded by the GENM Group on its USD denominated borrowings.

3. Prospects

The respective business operations of the Group continue to recover from the Coronavirus Disease 2019 ("COVID-19") related impacts. The detailed comments on performance for the quarter as well as the nine months ended 30 September 2023 have been included in Notes 1 and 2 above. Liquidity and working capital requirements continue to be closely monitored.

Even so, the performance of the Group for the remaining period of the 2023 financial year may be impacted as follows:

Global economic recovery is expected to remain slow and uneven. An escalation of geopolitical tensions, ongoing tight monetary policy and moderating growth momentum in certain major economies amid high inflation is expected to pose continued headwinds to global growth. In Malaysia, domestic demand and employment growth is expected to continue driving the expansion of the local economy.

The positive outlook for international tourism is expected to be sustained, although macroeconomic concerns could continue being a critical factor in the effective recovery of the travel and tourism sectors. Meanwhile, the regional gaming market is expected to continue recovering as airline capacity and air connectivity in the region improves.

GENM Group remains cautious of the near-term outlook of the leisure and hospitality industry but is positive in the longer-term.

In Malaysia, GENM Group continues to drive productivity improvements to strengthen the resilience of the business amid an increasingly challenging operating environment. GENM Group will continue to place emphasis on operational excellence and effective cost management, positioning GENM Group to capitalise on the long-term growth trajectory in travel from the wider region. At the same time, GENM Group will optimise yield management and database marketing efforts to grow business volumes and visitation at RWG. Meanwhile, ongoing upgrading and development works at the mid-hill are progressing well, with new product offerings and attractions in the pipeline. GENM Group will also continue to invest in infrastructure enhancements at Genting Highlands to ensure the safety of visitors and the surrounding community.

In the UK, GENM Group remains cautious of the challenges implicit in the operating environment. GENM Group will continue to explore strategies to strengthen the resilience of its business, which include reorganising its operations to optimise efficiencies, whilst exploring opportunities to deliver growth. Proactive cost management efforts will concurrently be emphasised to improve operating margins and enhance the agility of its operations in navigating the volatile environment.

In the US, GENM Group is steadfast in exploring opportunities to reinforce its competitive position in the region, which include developments surrounding the New York Gaming Facility Board's Request for Application to solicit proposals for up to three commercial casinos in New York State. Meanwhile, GENM Group will continue to implement various productivity enhancement initiatives and capability-sharing efforts to drive synergies between RWNYC and Empire's properties and improve the overall returns of its US business. In the Bahamas, GENM Group will continue to collaborate with international cruise operators to increase the number of port calls at RW Bimini. Additionally, GENM Group will keep intensifying marketing efforts and promotional activities to grow visitation at the resort. Meanwhile, emphasis remains on stringent financial management and driving operational efficiencies to improve the profitability of its operations.

GENS' Board of Directors has approved a total investment of around SGD6.8 billion. GENS is confident that this investment will firmly anchor RWS as the most sought-after tourism destination in Asia, and propel GENS' strong future growth. This investment will be funded through internal resources.

The Waterfront development has received government's provisional permission with construction set to commence in 2024. The Waterfront development comprises approximately 700 hotel keys and experiential lifestyle content in a captivating blend of biophilic architecture that is designed by award winning firm Benoy. Coupled with a striking new waterfront sculpture designed by Heatherwick Studio, it will transform Singapore's skyline and form a monumental gateway to RWS and the new Greater Southern Waterfront precinct.

As an update, the transformation of the Forum, the Minion Land in Universal Studios Singapore and the Singapore Oceanarium, are progressing well and expected to soft open in early 2025.

GENS advanced its commitment to achieving carbon neutrality through a transformative partnership with Honeywell. Together, they launched a large scale cloud-based Building Management System, which aims to enhance energy efficiency across the integrated resort.

On the social responsibility front, RWS has deepened its commitment by collaborating with Food from the Heart, a local charitable organisation, to fund and enable equitable distribution of fresh, locally sourced produce to 2,400 underprivileged families across the island over the next three years.

In Las Vegas, visitor volume in the State of Nevada has returned to pre-pandemic levels with international travel continuing to recover as COVID-19 travel restrictions ease and air travel into Las Vegas continues to grow according to the Las Vegas Convention Visitors Authority. Further, visitor volume increased by 6.6% and convention attendance increased by 27.8% in the current year-to-date September compared with the same period in the previous year. 2023 attendance is expected to surpass 2019 levels, as larger conventions return and new sporting events are introduced such as Formula 1 Las Vegas Grand Prix and NFL Super Bowl in 2024. The occupancy rate and ADR achieved in the current quarter show positive movement towards future targeted projections. With the growing return of conventions and business travel to Las Vegas, RWLV will have its highest mix of convention base room nights in 2023. Future projects such as additional dining, entertainment, and retail offerings and new performances at the Resorts World Theatre are expected to drive significant foot traffic for the remainder of 2023 and beyond.

RWLV intends to continue building on its strong momentum by leveraging the Hilton branding partnership with over 166 million Hilton Honors members and capitalising on the return of the convention business and the property's proximity to the newly expanded Las Vegas Convention Center ("LVCC"). In addition, RWLV's guests can now utilise The Boring Company's underground transportation system which transports guests between RWLV and the LVCC in minutes. This added convenience is a unique experience at present, with RWLV's passenger station being the first of over 55 stops anticipated to form the Vegas Loop. As international travel continues to resume and with strong demand for domestic travel to Las Vegas, RWLV remains focused on growth opportunities, including ongoing efforts to build RWLV's database for casino and resort marketing.

GENP Group's prospects for the remaining months of 2023 will track the performance of its mainstay Plantation segment, which is in turn dependent principally on the movements in palm products prices and GENP Group's FFB production.

In the immediate term, GENP Group anticipates palm oil price to be under pressure in view of the steadily rising inventory in Malaysia and key importing countries. In addition, palm oil had to contend with larger supply of competitor vegetable oils in view of the recovery in production of soybean in Argentina and sunflower in the Black Sea region. However, in the longer term, palm oil price would remain supported by weaker production prospects owing to slow down of new planting, deferral of replanting and uncertainties of weather conditions.

GENP Group's year-on-year production growth for current nine months was mainly driven by its Indonesian operations and this growth is expected to extend into the remaining months of the year, compensating for the muted growth in the Malaysian operations consequential to its ongoing replanting activities. Nevertheless, the impact of El Niño on GENP Group's production remains to be seen as GENP Group is experiencing mixed weather patterns in different geographical locations.

The Property segment will continue to offer products which cater to a broader market segment, taking into consideration the prevailing market sentiments. Meanwhile, the Premium Outlets® remain steadfast in looking out for opportunities to expand regionally and enhance its tenant portfolio.

The Downstream Manufacturing segment continues to face stiff competition for its refined palm products due to Indonesia's export tax structure. On the other hand, the segment's palm-based biodiesel will continue to cater mainly for Malaysian biodiesel mandate as biodiesel export remain challenging.

The performance of the Group's supercritical coal-fired Banten power plant in Indonesia is expected to be robust with high plant load factor and availability, coupled with improved efficiency. The plant remains a high dispatch priority amongst all the thermal power plants in Jawa Island. The 49% owned joint venture, SDIC Genting Meizhou Wan Electric Power Company Limited is expected to deliver a stronger performance arising from less volatile global and domestic coal prices, backed by adequate coal inventories as well as higher demand for electricity. However, the performance of Jangi Wind Farm in Gujarat is expected to be significantly affected by the downtime taken for the repairs of the wind turbine generators' damaged blades caused by Biparjoy cyclone.

The Group maintains a positive outlook on its 49% working interest in the Petroleum Contract for Petroleum Exploration, Development and Production in Chengdaoxi Block in the shallow waters of Bohai Bay, China, arising from anticipated stable production and the favourable outlook for global crude oil prices. This is also driven by tightening global supply and demand which is forecasted to improve. Consequent to the approval of the revised Plan of Development 1 (“revised POD 1”) in February 2023, development activities are progressing as per plan for the Kasuri Block in West Papua, Indonesia. Following the signing of a Heads of Agreement with PT Pupuk Kalimantan Timur (“PTPKT”), a conditional Gas Sale Agreement (“conditional GSA”) was signed on 20 September 2023 during the 4th International Convention on Indonesian Upstream Oil & Gas 2023. The effectiveness of this conditional GSA is subject to PTPKT’s fulfilment of certain conditions which include the procurement of an EPC Contract for the construction of its Amurea plant as well as obtaining certain licenses for the utilisation and acquisition of the land in Fakfak, West Papua, Indonesia. All these conditions shall be met by 1 December 2024, failing which the conditional GSA can be terminated. On a separate but related development in the Indonesia Oil & Gas industry, PT Layan Nusantara Gas, an indirect Indonesian subsidiary of the Company has entered into an agreement with Wison (Nantong) Heavy Industry Co. Ltd (“Wison”) on 8 September 2023 to procure USD43.03 million of long lead items for a floating liquefied natural gas (“FLNG”) facility to be operated in West Papua, Indonesia. The signing of this agreement marks a key milestone to achieve first drop of LNG in Kasuri Block by middle of 2026. Wison is currently conducting the front-end engineering and design study for the FLNG facility, which is estimated to be completed before end of 2023.

4. Variance of Actual Profit from Forecast Profit

The Group did not issue any profit forecast or profit guarantee for the year.

5. Taxation

The breakdown of tax charges for the current quarter and nine months ended 30 September 2023 is set out below:

	Current Year Quarter 30/09/2023 RM'million	Preceding Year Corresponding Quarter 30/09/2022 RM'million	Current Year to date 30/09/2023 RM'million	Preceding Year Corresponding Period 30/09/2022 RM'million
Current taxation				
Malaysian income tax charge	68.0	66.3	173.7	205.8
Foreign income tax charge	282.2	195.9	678.2	455.8
	<u>350.2</u>	<u>262.2</u>	<u>851.9</u>	<u>661.6</u>

**GENTING BERHAD ANNOUNCES THIRD QUARTER RESULTS
FOR THE PERIOD ENDED 30 SEPTEMBER 2023**

- **Group revenue of RM7.4 billion and EBITDA of RM2.7 billion in 3Q23 improved by 20% and 33% respectively over 3Q22**
- **Group's net profit up from RM359 million in 3Q22 to RM995 million in 3Q23**
- **Leisure & Hospitality Division continues with recovery momentum**

KUALA LUMPUR, 23 NOVEMBER 2023 - Genting Berhad today announced its financial results for the third quarter ("3Q23") and nine months ended 30 September 2023 ("YTD 3Q23").

In 3Q23, Group revenue was RM7,369.5 million, an increase of 20% compared with the previous year's corresponding quarter's ("3Q22") revenue of RM6,121.6 million. The increase in revenue was contributed mainly by the Leisure & Hospitality Division. The Group's adjusted earnings before interest, tax, depreciation and amortisation ("EBITDA") for 3Q23 was RM2,728.0 million, an increase of 33% compared with RM2,056.4 million in 3Q22.

Resorts World Sentosa ("RWS") continued to benefit from the sustained recovery of travel and tourism by recording a higher revenue and EBITDA in 3Q23.

Resorts World Genting ("RWG") recorded higher revenue in 3Q23 over 3Q22 mainly due to higher volume of business registered by RWG's gaming and non-gaming segments. Consequently, a higher EBITDA was recorded primarily due to the higher revenue which was partially offset by higher operating expenses in 3Q23.

The revenue from the leisure and hospitality businesses in the United Kingdom ("UK") and Egypt in 3Q23 was higher due to higher volume of business. A higher EBITDA was recorded mainly due to higher revenue, partially offset by higher payroll related costs.

The leisure and hospitality businesses in the United States of America ("US") and Bahamas included the financial results of Resorts World New York City ("RWNYC"), Resorts World Bimini ("RW Bimini") and Resorts World Las Vegas ("RWLV"). Higher revenue and EBITDA were recorded by RWNYC. RW Bimini's operating performance also improved with higher revenue as a result of relaxation on travel restrictions since 19 June 2022 leading to higher number of cruise calls that contributed positively to its revenue. A higher EBITDA was recorded mainly due to higher revenue, partially offset by higher operating and payroll related expenses.

RWLV achieved a new record for revenue and EBITDA in 3Q23 with better performance driven by the continued growth of convention business, strong performance from casino and strengthening of USD. Hotel occupancy and Average Daily Rate ("ADR") for 3Q23 were 91.1% and USD246 respectively, compared with 86.4% and USD232 in 3Q22.

PRESS RELEASE

For Immediate Release

Plantation Division's revenue was lower in 3Q23 due to lower sales volume at Downstream Manufacturing, partly compensated by Oil Palm Plantation which recorded higher revenue on the back of stronger fresh fruit bunches ("FFB") production. Consequently, EBITDA for Oil Palm Plantation was higher in line with higher FFB production. The Downstream Manufacturing segment recorded losses in 3Q23.

The Oil & Gas Division recorded lower revenue and EBITDA mainly due to weaker global crude oil prices in 3Q23.

Profit before taxation of RM1,391.0 million was recorded in 3Q23 compared with RM734.5 million in 3Q22. The higher profit was mainly due to higher EBITDA, coupled with lower impairment losses, lower net finance cost, higher share of profit in joint ventures and associates, partially offset by higher depreciation and amortisation. The higher share of profit in joint ventures and associates was mainly contributed from the Meizhou Wan power plant in China due to higher generation coupled with lower coal cost compared with 3Q22.

Group revenue of RM19,851.2 million and EBITDA of RM6,556.6 million for YTD 3Q23 improved by 24% and 22% respectively over the previous year's nine months ("YTD 3Q22"). The improved results are attributed mainly to the contribution from the Leisure & Hospitality Division.

Revenue and EBITDA of RWS increased significantly over YTD 3Q22 by 60% and 63% respectively.

Revenue from RWG in YTD 3Q23 was higher mainly due to higher business volume from the gaming and non-gaming segments following the relaxation of border control as compared with YTD 3Q22, when several key markets had not yet reopened. Consequently, a higher EBITDA was recorded which was partially offset by higher operating expenses.

The leisure and hospitality businesses in UK and Egypt recorded higher revenue mainly due to higher volume of business. However, a lower EBITDA was recorded compared with YTD 3Q22 primarily due to higher payroll and related costs which were partially offset by the higher revenue.

Higher revenue and EBITDA were recorded from the leisure and hospitality businesses in the US and Bahamas. RWNYC recorded a higher revenue mainly due to overall higher volume of business. Improved operating performance of RW Bimini resulted from relaxation on travel restriction since 19 June 2022 leading to higher number of cruise calls that contributed positively to its revenue. EBITDA of RWNYC and RW Bimini likewise increased, partially offset by higher operating and payroll related expenses.

RWLV achieved a hotel occupancy rate and ADR of 90.4% and USD256 respectively in YTD 3Q23, compared with 82.4% and USD233 for YTD 3Q22. In addition, RWLV benefited from a mix of concert headliners and events, including the NFL Super Bowl and college basketball tournaments, paired with a robust convention quarter which drove strong visitation to RWLV's property. The stronger USD also contributed to increased revenue and EBITDA.

Revenue and EBITDA from the Plantation Division in YTD 3Q23 were lower mainly due to weaker palm products prices which outweighed the improvement in the FFB production mainly driven by the Indonesian estates. EBITDA from Downstream Manufacturing was lower owing to margin deterioration.

PRESS RELEASE

For Immediate Release

Revenue and EBITDA of the Power Division improved in YTD 3Q23 mainly due to higher generation from the Banten Plant in Indonesia following a shorter outage period. The Oil & Gas Division recorded lower revenue and EBITDA mainly due to lower global crude oil prices in YTD 3Q23.

EBITDA from Investments & Others included the impact of unrealised foreign exchange translation losses of Genting Malaysia Berhad ("GENM") Group's USD denominated borrowings mainly due to the strengthening of USD against RM.

A profit before taxation of RM2,701.5 million was recorded in YTD 3Q23 compared with RM1,145.3 million in YTD 3Q22. The higher profit was flowed down from higher EBITDA, coupled with net gain on disposal of property, plant and equipment, lower net finance cost, lower impairment losses and lower share of losses in joint ventures and associates.

The performance of the Group for the remaining period of the 2023 financial year may be impacted as follows:

Global economic recovery is expected to remain slow and uneven. An escalation of geopolitical tensions, ongoing tight monetary policy and moderating growth momentum in certain major economies amid high inflation is expected to pose continued headwinds to global growth. In Malaysia, domestic demand and employment growth is expected to continue driving the expansion of the local economy.

The positive outlook for international tourism is expected to be sustained, although macroeconomic concerns could continue being a critical factor in the effective recovery of the travel and tourism sectors. In the UK, GENM Group remains cautious of the challenges implicit in the operating environment. GENM Group will continue to explore strategies to strengthen the resilience of its business, which include reorganising its operations to optimise efficiencies, whilst exploring opportunities to deliver growth. Proactive cost management efforts will concurrently be emphasised to improve operating margins and enhance the agility of its operations in navigating the volatile environment.

The Waterfront development has received government's provisional permission with construction set to commence in 2024. The Waterfront development comprises approximately 700 hotel keys and experiential lifestyle content in a captivating blend of biophilic architecture that is designed by award winning firm Benoy. Coupled with a striking new waterfront sculpture designed by Heatherwick Studio, it will transform Singapore's skyline and form a monumental gateway to RWS and the new Greater Southern Waterfront precinct.

As an update, the transformation of the Forum, the Minion Land in Universal Studios Singapore and the Singapore Oceanarium, are progressing well and expected to soft open in early 2025.

GENS advanced its commitment to achieving carbon neutrality through a transformative partnership with Honeywell. Together, they launched a large scale cloud-based Building Management System, which aims to enhance energy efficiency across the integrated resort.

On the social responsibility front, RWS has deepened its commitment by collaborating with Food from the Heart, a local charitable organisation, to fund and enable equitable distribution of fresh, locally sourced produce to 2,400 underprivileged families across the island over the next three years.

PRESS RELEASE

For Immediate Release

In Las Vegas, visitor volume in the State of Nevada has returned to pre-pandemic levels with international travel continuing to recover as Coronavirus Disease 2019 (“COVID-19”) travel restrictions ease and air travel into Las Vegas continues to grow according to the Las Vegas Convention Visitors Authority. Further, visitor volume increased by 6.6% and convention attendance increased by 27.8% in YTD 3Q23 compared with YTD 3Q22. 2023 attendance is expected to surpass 2019 levels, as larger conventions return and new sporting events are introduced such as Formula 1 Las Vegas Grand Prix and NFL Super Bowl in 2024. The occupancy rate and ADR achieved in 3Q23 show positive movement towards future targeted projections. With the growing return of conventions and business travel to Las Vegas, RWLV will have its highest mix of convention base room nights in 2023. Future projects such as additional dining, entertainment, and retail offerings and new performances at the Resorts World Theatre are expected to drive significant foot traffic for the remainder of 2023 and beyond.

RWLV intends to continue building on its strong momentum by leveraging the Hilton branding partnership with over 166 million Hilton Honors members and capitalising on the return of the convention business and the property’s proximity to the newly expanded Las Vegas Convention Center (“LVCC”). In addition, RWLV’s guests can now utilise The Boring Company’s underground transportation system which transports guests between RWLV and the LVCC in minutes. This added convenience is a unique experience at present, with RWLV’s passenger station being the first of over 55 stops anticipated to form the Vegas Loop. As international travel continues to resume and with strong demand for domestic travel to Las Vegas, RWLV remains focused on growth opportunities, including ongoing efforts to build RWLV’s database for casino and resort marketing.

Genting Plantations Berhad (“GENP”) Group’s prospects for the remaining months of 2023 will track the performance of its mainstay Plantation segment, which is in turn dependent principally on the movements in palm products prices and GENP Group’s FFB production.

In the immediate term, GENP Group anticipates palm oil price to be under pressure in view of the steadily rising inventory in Malaysia and key importing countries. In addition, palm oil had to contend with larger supply of competitor vegetable oils in view of the recovery in production of soybean in Argentina and sunflower in the Black Sea region. However, in the longer term, palm oil price would remain supported by weaker production prospects owing to slow down of new planting, deferral of replanting and uncertainties of weather conditions.

GENP Group’s year-on-year production growth for YTD 3Q23 was mainly driven by its Indonesian operations and this growth is expected to extend into the remaining months of the year, compensating for the muted growth in the Malaysian operations consequential to its ongoing replanting activities. Nevertheless, the impact of El Niño on GENP Group’s production remains to be seen as GENP Group is experiencing mixed weather patterns in different geographical locations.

The Property segment will continue to offer products which cater to a broader market segment, taking into consideration the prevailing market sentiments. Meanwhile, the Premium Outlets® remain steadfast in looking out for opportunities to expand regionally and enhance its tenant portfolio.

PRESS RELEASE

For Immediate Release

The Downstream Manufacturing segment continues to face stiff competition for its refined palm products due to Indonesia's export tax structure. On the other hand, the segment's palm-based biodiesel will continue to cater mainly for Malaysian biodiesel mandate as biodiesel export remain challenging.

The performance of the Group's supercritical coal-fired Banten power plant in Indonesia is expected to be robust with high plant load factor and availability, coupled with improved efficiency. The plant remains a high dispatch priority amongst all the thermal power plants in Jawa Island. The 49% owned joint venture, SDIC Genting Meizhou Wan Electric Power Company Limited is expected to deliver a stronger performance arising from less volatile global and domestic coal prices, backed by adequate coal inventories as well as higher demand for electricity. However, the performance of Jangi Wind Farm in Gujarat is expected to be significantly affected by the downtime taken for the repairs of the wind turbine generators' damaged blades caused by Biparjoy cyclone.

The Group maintains a positive outlook on its 49% working interest in the Petroleum Contract for Petroleum Exploration, Development and Production in Chengdaoxi Block in the shallow waters of Bohai Bay, China, arising from anticipated stable production and the favourable outlook for global crude oil prices. This is also driven by tightening global supply and demand which is forecasted to improve. Consequent to the approval of the revised Plan of Development 1 ("revised POD 1") in February 2023, development activities are progressing as per plan for the Kasuri Block in West Papua, Indonesia. Following the signing of a Heads of Agreement with PT Pupuk Kalimantan Timur ("PTPKT"), a conditional Gas Sale Agreement ("conditional GSA") was signed on 20 September 2023 during the 4th International Convention on Indonesian Upstream Oil & Gas 2023. The effectiveness of this conditional GSA is subject to PTPKT's fulfilment of certain conditions which include the procurement of an EPC Contract for the construction of its Amurea plant as well as obtaining certain licenses for the utilisation and acquisition of the land in Fakfak, West Papua, Indonesia. All these conditions shall be met by 1 December 2024, failing which the conditional GSA can be terminated. On a separate but related development in the Indonesia Oil & Gas industry, PT Layan Nusantara Gas, an indirect Indonesian subsidiary of the Company has entered into an agreement with Wison (Nantong) Heavy Industry Co. Ltd ("Wison") on 8 September 2023 to procure USD43.03 million of long lead items for a floating liquefied natural gas ("FLNG") facility to be operated in West Papua, Indonesia. The signing of this agreement marks a key milestone to achieve first drop of LNG in Kasuri Block by middle of 2026. Wison is currently conducting the front-end engineering and design study for the FLNG facility, which is estimated to be completed before end of 2023.
